PROFESSIONAL SUMMARY

Results-driven Software/QA Engineer with expertise in full-stack development, AI integration, and quality engineering using Python, C#, React, Playwright, Azure AI Foundry, and cloud technologies. Skilled in creating automation solutions that leverage LLM agents, and API-driven workflows to streamline CI/CD pipelines and improve productivity.

EDUCATION

University of California, Riverside

Riverside, CA

B.S. Computer Science with Business Applications

2021 - 2025

Relevant Coursework: Data Structures and Algorithms, Software Development, Data Analysis Methods, Technical Communications, Probability and Statistics, Operating Systems, Artificial Intelligence, Networking, Cybersecurity

TECHNICAL SKILLS

Languages / Frameworks: Python, C/C++, C#, JavaScript/Typescript, React, Java, Bash, SQL, HTML, CSS, React Native, Vue.js, R, Flask, FastAPI, Expo, JSON, Node.js, MongoDB, Playwright

Developer Tools: Cursor, Codex, Claude, Azure, Git/GitHub, OpenAI Console, Firebase/Firestore, Postman, Jupyter Notebook, Figma, Microsoft 365, Agile Workflow

CERTIFICATIONS

AWS Certified Cloud Practitioner 🦋 — Asana Certified Workflow Specialist 🦋

EXPERIENCE

Fremont Bank

Livermore, CA

AI Software Engineer Intern

May 2026 – Present

- Led the integration of AI into visual regression testing in a regulated banking environment using **Azure AI Foundry**, **Playwright**, and **LLM agents**, increasing QA efficiency and enabling scalable visual testing workflows.
- Optimized test management workflows utilizing API automation scripts in **C#**, reducing manual operational overhead by 30% and improving **CI/CD** efficiency.

Idler

San Francisco, CA

QA Engineer

Dec 2025 – Apr 2026

- Reviewed coding agent performance by assessing test suites and code diffs across various complex codebases.
- Improved AI evaluation reliability and fairness with technical QA of golden patches, failure analyses, and rollouts.

Handshake

San Francisco, CA

AI Data Annotator / QC Specialist

Nov 2025 – Jun 2026

- Contributed to the development of large-scale multimodal AI training datasets through data annotation, validation, labeling, edge-case analysis, and quality control to ensure high-quality training data and model performance.

PROJECTS

GymReact [Demo](#)

Aug 2025

AI-Powered Cross-Platform Fitness App

- Developed and published a cross-platform mobile app with **React Native** and **Expo**, integrating the **OpenAI API** for personalized workout plans and intelligent activity tracking.
- Utilized **React Context API** and **React Native Paper**, with **Firebase Auth** for secure, structured user data.
- Engaged in Agile development practices with **GitHub code reviews** and **issue tracking** improving collaboration.

CapyReads [GitHub](#)

Jul 2025

Manga Web App

- Created a full-stack web application using **React**, **JavaScript**, **HTML**, and **CSS** that allows users to browse, read, and favorite trending manga, supporting 100+ active users.
- Designed a responsive frontend with **Material UI** and **TypeScript**, integrated with a robust **REST API** for async fetching **JSON** data and session handling.
- Deployed on **AWS EC2** with auto-scaling and **Cypress** end-to-end tests, reducing latency and increasing stability.
